Stroud's Judicial Dictionary of Words and Phrases | 11th Edition

Daniel Greenberg

Stroud's Judicial Dictionary has for over 100 years been the starting point for research into the meaning of all words and phrases that come to be used in a legal context. Stroud records how any expression that occurs in a statute or other legal document has been construed by the courts or defined in legislation.

Stroud is regularly cited to and by the senior courts as a primary reference when determining ranges of meaning given to different terms in legal contexts: from standard terms like "building", "conduct", "damage" and "repair", where the reader always needs to keep up with cross-contextual development of usage, through to niche terms where the reader might not guess that they have received judicial or legislative attention.

International Business Law Journal | La Revue de Droit des Affaires Internationales

General Editor: Professor Henry Lesguillons

The *International Business Law Journal* (also known as the *Revue de Droit des Affaires Internationales*) draws together the opinions of experts from around the world showing how company, contract, investment, taxation and financial law as well as arbitral decisions impact on international business.

The journal also focuses on the application of international conventions and the development of new rules by international economic organisations which have a direct or indirect impact on international business life.

With six issues a year, the journal tackles important and emerging issues facing commercial lawyers both in-house and in private practice. Specific attention is given to the practice and recent trends in matters of international contracts.
